Home Visiting Stakeholder Meeting

Linking Home Visiting and Other Early Childhood Data

March 11, 2019
Welcome and Introductions
Agenda

1. Ice Breaker
2. Setting the Stage
3. Voices from the Field
4. Policy and Research Questions: Discussion Activity
5. Call to Action
1. Ice Breaker
QUESTION

Who is here today?
QUESTION

What is our familiarity with using data?
The bar chart shows the level of experience and the percent of responses.

- **Little**: 22%
- **Moderate**: 49%
- **Very**: 29%

The chart indicates the following:

- 22% of responses are for “Little” level of experience.
- 49% of responses are for “Moderate” level of experience.
- 29% of responses are for “Very” level of experience.
QUESTION

What are our top priorities when using data?
The chart shows the percent of responses for various priorities and areas.

- **Recruitment and participation** (43%)
- **Improve scheduling** (33%)
- **Improve services** (27%)
- **Retention** (18%)
- **Understanding needs and referrals** (17%)
- **Understanding pops served** (8%)
- **Travel** (3%)
- **Reduce burden** (1%)

The percentages are marked on the y-axis ranging from 0% to 50%.
2. Setting the Stage
SHINE Project

- **State-level Home visiting Integration with Early childhood data systems (SHINE)**

- **Goal:** To support states with linking their home visiting data with other early childhood data
  1. Provide technical assistance to 5 states to support their data integration work
  2. Develop a toolkit of resources for states interested in similar home visiting data integration efforts
Linking early childhood data

Linking early childhood data

- **10 states** are linking home visiting data with other ECE data
- Home visiting programs are least likely to be linked compared to other ECE programs
Benefits and challenges with home visiting (HV) data integration

Benefits
- Helps reduce duplication of efforts and can be used to support service coordination
- Answers critical policy and research questions, including about short- and long-term outcomes
- Provides a fuller picture of the comprehensive early childhood system and the services families receive
Benefits and challenges with home visiting (HV) data integration

- **Challenges**
  - Data are disconnected across HV programs/models and from other early childhood data
  - Complex funding structure and an array of state and federal privacy statutes and regulations
Referrals
Of the children who were identified by a home visitation program as possibly being developmentally delayed, how many received an initial screening from Sooner Start within the 45-day window as per the grant requirements and state regulations?
3. Voices from the Field
4. Policy and Research Questions: Discussion Activity
5. Call to Action
What are 1-3 action steps?
